REIGN OF ASSASSINATION NOW COVERS REPUBLIC OF MEXICO; NEW REVOLUTION IS BREWING

MADERO FOULLY MURDERED; MEXICAN TREASURY EMPTY; AMERICANS STORING ARMS

COMMUNICATION WITH FORMER DICTATOR, WHO DI-RECTS NEW REGIME.

WASHINGTON, Feb. 24 -- Pres- Military Honors for Deadident Taft reiterated today that he will not intervene in Mexico unless attacks are made on Americans or foreigners.

The second division of the United States army, comprising the Fourth, Fifth and Sixth brigades, were this afternoon ordered to proceed son's will regarding intervention. The headquarters of the Fourth brigade are in Chicago, the headquarters of the Fifth in Wyoming. The Sixth brigade is already on its way to Galveston. This places 15,000 troops in Galveston ready to move on or-

Madero Is Killed-

of assassination, which has already version of the killing of the former friends of the bride will be glad to Smyrna, under whose auspices the claimed the lives of former President president and vice president. It is Madero, his brother Gustavo Ma- stated that the Mexican treasury is dero and former Vice President practically empty. Saurez, as well as many persons of lesser rank, has followed the recent No Intervention Yetrevolution. No one knows who will be the next victim.

President Huerta and General Diaz have not only apparently adopted the harsh "blood and iron" methods of former Dictator Diaz, but are known to be constantly in communication with him, and it is believed Profirio Diaz is advising the new government.

The reiteration of President Taft that the .United States will not in- yet." terfere as long as the shughter is confined to Mexicans has emboldened the officials of the new government, and the refusal of the foreign diplomats to attend a luncheon given today by Foreign Secretary DeLabarra, to hear the "official" explanation of the deaths of Madero and Saurez, caused no apprehension of arrests

being made by the wholesale today. The penitentiaries are being rap-

idly filled with prisoners. The official autopsy on the bodies of Madero and Saurez today bears out the charge that they were slain in cold blood. Two rifle bullets entered the back of Madero's head, coming out in the front. The weapons were apparently held close to the head, The body of Saurez showed eight rifle shots had entered the chest and abdomen, fired from in front. The automobile in which the men were riding was rid-

dled with bullets. ! After the autopsy the bodies were turned over to relatives, who fear to give out any information. Senora Madero is today prostrated, hysteri-

cal and delerious. Newspaper men who were eye witnesses to the tragedy say the men were killed in the rear of the

dent-elect Wilson today that the po- have been held at Mound Grove at sition of secretary of state has been the invitation of the John Anderson offered to William Jennings Bryan Highway association and no public and that he has accepted the offer. gathering was held. A dozen or 15 that persons took the outing on board the one steamer Floridian and C. F. Burgman definitely announced up to the and T. R. Simpson, members of the executive committee of the asso Mr. Wilson made the announcement tion, made the trip by automobile Mound Grove and for a few north of that place into St. Job county, accompanied by Arthur Wright, photographer, of this city and representatives of the Halifax Journal and the Daily News, who had been invited to go with FUNERAL SERVICES HELD FOR committee to view the work already FATHER OF MRS. MALEY AND accomplished and that in progress on comfortable Packard car, in charge of W. F. Manning, who proved skillful and careful driver.

> Rain began falling shortly before 10 a. m., the time set for departure from Wilman's opera house, Seabreeze, and the cars gathering for the journey to Mound Grove soon dispersed. Later the weather brightened somewhat and the committee car started on the trip at about 10:30 o'clock.

> The town of Seabreeze has come pleted the shelling of Seabreeze avenue to its north line, connecting with the roadway opened along the river front to Ormond. This part of the road is still unsurfaced until reaches the beautiful residences mile or more south of the Ormo hotel and from this point northward through the greater part of the Ormond district the road is very good.

The party stopped for a few moments at the Bostrom place and again at Number Nine, where all alighted and were shown around by B. F. Nordman, Jr., manager of this well known place. Mr. Nordman took the party into his jelly room, U. S. No. 77 Tires, Roller Chains, which contained a fine display of Motor Handle Bars, Mud Guards, Big jellies and preserves of various Will be on sale about first of March at kinds and treated them to crystalized orange and grapefruit, which were most delicious and appetizing sweetments. Mr. Wright embraced the opportunity to make a protograph of a giant cactus of the prickly pear variety which is said to be over 30 years old, and after sampling the kumquats, of which there great numbers, the party bid Mr. Nordman goodbye and continued on their course to Mound Grove.

Along the way were evidences of the work being done by the county convicts under the direction of Road Superintendent W. D. Bradshaw and the supervision of County Commissioner Wm. Jackson. The roadway

The finest res hotel in the wor is being built at **Sunset Mountain** Asheville, N.C.

Absolutely Fireproof Will open July 1st

Wm. S. KENNEY, manager

MR. E. W. GROVE, of St. Louis, Mo., is building the finest resort hotel in the world, to be opened July 1st, 1913. It will be absolutely fireproof, and is being built of the great boulders of Susset Mountain. whose foot it sits. It is being built by hand in the old-fashioned way Full of rest and comfort and wholesomeness

The front lawn is the hundred-acre eighteen-hole golf links of the Asheville Country Club, and with it sixty acres of our own lawn.

The purest water obtainable anywhere, piped seventeen miles, from the slopes of Mount Mitchell, over 6000 feet altitude. Biltmore milk and cream exclusively, supplied from 200 registered Jerseys on the cetate of Mr. Geo. W. Vanderbilt. It is doubtful if this famous dairy is equaled in the world.

I Four hundred one-piece rugs are being made at Aubusson, France. Seven hundred pieces of the furniture are being made by hand by the Roycrofters. The silver will be hand-hammered.

The plumbing material will be the finest that has ever been placed in any hotel in the world. The soil pipe has been hydraulicly tested and then galvanized. The hot water pipe, 18,000 lbs. in weight, will be solid brass. The steam pipes are Byers genuine lap-welded wrought iron tested hydraulicly to 1000 lbs. The bathtubs and fixtures all solid porcelain. No pipes visible anywhere. No radiators to be seen-all placed in recesses under windows. No electric bulbs to be seen.

The "Big Room," or what some call the lobby, is 80 feet by 120, and the rugs in this one room will be worth \$5000.00. The two great fire. places in it will burn twelve-foot logs.

I For the golfers we are building lockers and shower bath rooms with a forty-foot swimming pool that will not be excelled by the finest clubs in existence, and the players will be less than 100 yards distant when they

Mr. Wm. S. Kenney, of Bretton Woods, N. H., who has shown in his management of The Mount Washington hotel and Hotel Clarendon, that he is the peer of hotel keepers, will manage the Inn. We own eight hundred acres around the Inn (consumptives not

HAS PLEASANT TRIP DOWN THE WATERWAY TO MIAMI

GEORGE H. RICE SEES COUNTRY AND VISITS MANY PLACES OF INTEREST IN TE ONTHOURY TO THE SOUTH.

George H. Rice, of Worcester, Mass., who is spending the winter in Daytona at 103 Cedar street, with his wife and daughter, has just returned from a five weeks trip down the river as far as Miami.

With a party of three other men from Worcester they sailed from Daytona January 13th on the houseboat, A. S. Ry., stopping off all along the line to visit towns and cities, inlets, orange groves, pineapple farms and miles and miles of cultivated garden land, with tomatoes, beans, peppers, cabbage, onions and all kinds of vegetables. And finally, in the southern portion, the cocoanuts, paw paw, sapodilla, royal palm, royal poinciana,

Mr. Rice was a pioneer camper and hunter on the Indian river, coming to Port Orange more than 30 years and for eleven years he sailed his boat, hunted and fished over these same waters when they were a comparative wilderness.

On the present trip he found several of his old friends of long ago of which he was chairman. who are still living on the river, are extensive land and ship owners about Palm Beach, and Mr. Rice took much pleasure in noting the great changes wrought in the development' of all the property along the river and can-

SCIENCE IN THE STAR ROLE

Highbrew Professors Filled Up the Cast, and, With Acids and Precious Metals as Stage Properties, Thay Scored a Brilliant Success.

Even the United States governo day fever to eliminate any waste a stop leaks in the methods of do things. The results, particularly in the mints and assay offices, have been

For instance, the old method of extracting gold from baser metals when it came from the mint consisted men of, treating the smelter bars of gold with nitric acid, which dissolved out the baser metals, leaving the gold with a small percentage of impurities that could be removed by fusing with niter.

Germany went the United States one better in this. The professors over there, men whose genius for scientific detail is unsurpassed by those of any other nation, perfected a process for refining by electricity. Simply stated, it is nothing more nor less than electric plating. The smelter bars are placed in the plating bath, and the gold is deposited in an absolutely pure state, leaving the base metals behind in solu-

It was this residue that interested the high brow professors. The fact that platinum is frequently found with gold has been recognized ever since the science of metallurgy was in swaddling clothes; also the fact that gold and platinum have one quality in common-i. e., that no single acid known will dissolve them. It takes a combination of nitric and muriatic acids to get either of these two metals in solution. Silver, on the other hand, is readily soluble in nitric acid. No one ever thought of testing a nitric ocid solution of silver for the presence of platinum because of the theory, sound as religion, that platinum could not be dissolved by nitric acid. Therefore, it was argued, if there wasn't enough silver in the solution to make it worth while to extract it, then, of course, there could not be any platinum, so

The professors began to experiment. At the first step they uncovered the dusky gentleman in the wood pile. They discovered a curious fact-nameharp shaped piece of wood, having two leged to have arisen when the ly, that, while platinum alone was not or three strings. From time to time woman handed the man a glass filled soluble in nitric acid, some of its almore strings were added until the with gasoline. The man thought he instance, a composition of 5 per cent was being handed a glass of liquor, platinum in silver is readily soluble. and smiled with satisfaction as he Right there was the clew leading to the na to make easy communication with open space. Many centuries afterward prepared to drink the inviting look- discovery that for years out of memfine hotels on the ocean beach. In musicians conceived the idea of ing liquid and held it in his hand as ory untold quantities of the precious other places, like Royal Park, Palm stretching strings across an open box he lighted the stump of a cigar in metal, essential above all others in electrical manufactures, had been running into the sewer. All solutions were carefully tested. Salts of iron were added, precipitates supposedly of silver were analyzed, and since then platinum at the rate of \$5,000 a month has

been offered for sale by Uncle Sam. It is interesting to trace the sources that sooner or later deposits of platinum in large quantities are going to be found. Little of the gold coming from the western United states and Alaska contains platinum. It is found almost entirely in the gold mined in Mexico and South America. Gold from these districts is coming in larger quantities year after year. It is found, for instance, in what is popularly known as Guinea gold. Guinea gold has a peculiar luster all its own. It is highly prized in the jewelry trade for this same peculiar color.

There are vast reaches of wilderness in South America that, filled with miasmic swamps and lurid savages armed with poisoned arrows, have so far resisted the advance of the white man. It seems not too much to expect that sooner or later, when these districts are exploited, platinum in large quantities will be discovered. Some Bret Harte is probably a-borning now to sing the romance of Platinum gulch. The romance of gold is founded on the material consideration of \$20.67 an ounce, which the governments of the earth have decreed must be its price now and for evermore. They will have to build a second story extension on the romance of the metal that is worth twice as much as gold.

Now that Uncle Sam is finding this mine of platinum in the supposedly unalloyed bars that the big refining companies are sending in from their smelt ers, the interesting question is arising Who owns the platinum, Uncle Sam or the refineries? Uncle Sam bought theis gold, refined it for them at cost and paid them dollar for dollar out of his pocket. Actually he was out on the transaction. Now that he has stopped the leak in his drainpipe, he is a little

Naturally, if one can play at a game two can play at the same game. Some of the bigger smelter companies, whose output is sufficient, have undertaken the task of recovering this platinum themselves. If Uncle Sam can help out his payroll with platinum residues there is no reason why a privately conducted smelter cannot do the same thing. So the electrical method of refining is coming more and more into use, and the highbrow professors in the mints who have been searching for platinum have discovered that the smelter bars sent in for coinage are almost 100 per cent fine, without so much as a smell of platinum in them .- F. Irving Anderson in New York Tribune.

The universality of the testimony is a proof of its truth.

Thus the winners have planted guideposts all along the road to success, so that the wayfaring man, even though a fool, need not miss the directions. There are many roads leading from

this main highway. One is called intemperance. Beware

Another is saziness. Shun it as you would a pestilence. A third is untruthfulness. Do not let your feet stray this way.

A fourth is named debt You will find pitfalls in this path. Avoid the byways They lend no

Keep in the middle of the road.

PUBLIC MANNERS.

We had numberless examples of ft

during the late presidential campaign. The candidates for our highest office were almost mobbed by the crowds. were jammed and rushed, called by their tirst names or nicknames and generally treated in a way that showed public bad manners.

Yet most of the men making up these mobs probably pass as well bred. In their personal relations they are doubtless courteous and considerate of

Do we not need lessons in public manners?

The question goes deeper. Not only manners are involved, but morals. The lynching bee is an example. The mob may be composed of mild mannered and exemplary men; but, joined to others, they become savage brutes.

Do we not need education in public

The problem goes still deeper. It is not the crowd that is at fault, but a failure to distinguish between public Pass is history, not fiction, though, it and private.

Some man is elected to office. As a private citizen he is reputed to be honest. After a few years in public place

It is discovered that he is a grafter, a defaulter or a corruptionist. He seems to think public money may

IMPORTERS OF IRISH AND

be stolen with impunity because it be-longs to nobody in particular.

He does not hesitate to enrich or ad-vance himself at the expense of the entire community. He commits crimes that he would not think of committing

in his private capacity.

Do we not need training in public

Theft of public property is even worse than theft of private property because it concerns more people. Violation of public standards is more demoralizing than violation of private standards for the reason that the example is seen by the multitude.

Democracy is comparatively new in the history of the world. It has made we have not yet learned all of the royal lessons of kingship over self. Still less have we learned our right

relationship to the public. Each person is a dual being, an indi-

vidual and a part of society. ners and more public honesty.

YOUTH IN AGE.

The other day Andrew D. White on County Record. nounced that he had taken up the investigation of criminology and expected to make, possibly, some important contributions to the subject before he

When a man can take up a new

Many men at Andrew D. White's age, who have done but a fraction of the good he has accomplished. would be willing to rest on their laurels.

This man, it must be remembered. practically founded a great university, capital, has assumed sufficient proof which he was for many years president, was a distinguished ambassador to an important foreign nation and has been for years a publicist and leader of thought.

Yet he has no intention of stopping. He sees an opportunity of further good by studying the treatment of the outcast and the criminal.

The world owes much to its young old men, those who keep the heart of youth when they have the wisdom of

The trouble with some old men is fossilization. They are unwilling to a clog against making the present the convention a success. times better. They are not receptive to new ideas.

It was Byron who hit off that retrospective turn of mind when he said: The good old times! All times when

Men do in crowds what they would understand all the currents of our age. this day is the best in the world tory. Tomorrow will be better. The man who keeps a young spirit

sunrise rather than to the sunset is before the about the finest and most inspiring spectacle seen in our human world. This age is full of such men-also of

such women. There was William Ewart Gladstone, leading a new crusade at eighty. There was Julia Ward Howe, keenly alive to the reforms of the present and the future up to her death at ninety.

It is a matter of whether the spirit or the body dominates. The spirit is ever young. If that leads us we are

present day joy, present day progress. present day work.

In our thought we should hold eterasl youth.

Battle of Sabine Pass.

The story of the battle of Sabine must be confessed, it sounded far more like the latter than the former. You will find the full accounts of the fight in the "Records of the Rebellion" and a very interesting history of the affair in the second volume of "The Rise and Fall of the Confederate Government," by Jefferson Davis,

As a Great Statesman Boasted.

CENTRAL AMERICAN REVOLTS?

BOTH GERMANY AND JAPAN ARE SEEKING TO ESTABLISH NAV-

AL BASES IN THE WESTERN HEMISPHERE.

WASHINGTON, Feb. 24-ls Japan or Germany stirring up strife and secretly preaching sedition in Central American countries in order that be compelled to send all her battleships and fighting strength away from her own shores to quell the disturbances?

When our coastlines and fortresses are left unguarded and all our attention turned toward Central America will Japan or Germany swoop down on the states themselves, catching her defenders off their guards?

Will it be necessary for the incoming president of the United States to issue a call for volunteers? Would we eventually be able successfully to repel such an invasion should it be visited upon us?

There are those in this nation who fear that we have become over confident in the enjoyment of long enduring, piping times of peace.

Germany is armed to the teeth. Japan is a wasp. Her people are intoxicated by the first thrills of re- New York World. juvenation; her soldiers sleep on

There are 700,000 Germans in Brazil while Central America and Mexico are overrun with them; the financial and commercial interests of the Fatherland in these countries are enormous and Germany already has tried to establish a naval base North American territory, Hawaii is a pearl, dangling by the thinnest males unprovided for. controls them and near to the nations which covets these posses-

The peninsula of Lower California is the object of longing eyes. Her mountains are storehouses of wealth and her harbors are wonderfully adapted for coaling stations naval bases.

Over against this is set a short paragraph written by a hand which no living man has ever shaken and a treaty of cession made by a nation which either must treat or fight a

The first is the Monroe Doctrine usurpation of strictly American con- lier's Weekly. tinental rights by European powers. The Monroe Doctrine is a thorn | in the side of England, of Russia, of Italy, of Spain, of France, but mostly it pricks Germany.

The treaty which was the instrument ceding the Philippine islands to the United States at the close of the Spanish war, according to many, is not worth the paper it is written

on. Certainly it will become worthless the moment Spain thinks this country can no longer hold these islands. Spain will never think that, in all probability, but other nations, Japan for instance, might presume that just because Spain was beaten in a sea fight or two and because the United States paid some millions of dollars to the Dons for these islinds, there is still no valid reason why she should not seize them for her own enjoyment. That is the case, in all its various aspects.

The department of justice recently claimed to have unearthed a conspiracy which contemplated a concerted revolt in practically all of the Central American countries. The first step was taken, it was alleged when the president of San Salvador, a Central American republic, fell at the hand of an assassin. A result was an order that all suspected ships clearing gulf ports should be examined for indications of filibustering expeditions. Mexico has blown like a mine. Cuba ferments. Other Central American countries are rest-
